

EPIC WIRELESS GROUP

605 Coolidge Drive, Suite 100
Folsom, CA 95630
(916) 781-5921

From issuance of search ring to on-air, Epic's proven approach to site development, modifications, and lease negotiations maximize speed to market within site development budget constraints.

Our exceptional team of telecom professionals have collectively built and managed the modification of thousands of wireless sites for carriers and tower companies throughout Northern California and Nevada.

OUR SERVICES

SITE ACQUISITION □ Epic's specialists can take a search ring and quickly identify viable candidate properties where sites can be RF approved, leased, zoned and constructed in a timely manner. By focusing acquisition on quality sites with advantageous schedule capabilities, Epic can shorten the lead-time on leasing and zoning approvals to expedite the project into the construction phase and bring sites on-air efficiently.

ARCHITECTURE & ENGINEERING □ We provide facility designs that fulfill both the functional and aesthetic requirements of the jurisdiction and the client, from simple to complex. We design to ensure that permit acquisition and construction proceed effectively. We work closely with our clients to ensure that their schedules are maintained.

LAND USE PLANNING & PERMITTING □ Epic's years of experience, longstanding relationships with many communities and targeted professional specialties help avoid red tape and move ventures smoothly through the required processes.

PROGRAM MANAGEMENT □ By focusing on the essential elements of project success — seamless single-point responsibility, technology expertise, rapid mobilization, resource optimization, flexibility, and safety — Epic meets clients' objectives for time to market, team member reliability, product quality, and cost control.

CONSTRUCTION MANAGEMENT □ Epic's construction professionals have what it takes to design and construct telecommunications facilities. Our experience, flexibility, quality processes and most importantly, focus on safety, ensure successful wireless deployments. Epic Wireless has experienced Construction Managers who understand what it takes to design a site that can be built quickly and efficiently.

Epic's most recently awarded contracts include new site builds, small cell sites, polygons, generator adds, HUB upgrades, antennae adds, and many other site modifications. These projects have allowed Epic to move forward as one of the leading professional services companies in Northern California.
